

Message from the NCA 2014 Program Committee Co-Chairs

Welcome to the 13th edition of the IEEE International Symposium on Network Computing and Applications.

This year we received 76 submissions, and we accepted 24 as full papers, which means an acceptance ratio of 31.6%. Moreover, due to high quality of the submissions we also accepted 25 additional ones as short papers. We thank the authors for making it possible to compose a program of the conference. We also acknowledge the Program Committee members for providing thorough reviews that made the paper selection possible.

As is already a tradition, the conference will be located in the Boston/Cambridge area in USA. We expect the attendance of researchers from a wide range of fields within Network Computing and Applications. These include: Cloud Computing; Overlay, Cellular and Sensor Networks; MANET; Network Security; Efficient Computation and Communication; Self Adaptation and Protocols; Distributed Systems; and Theory. We hope this compelling program will attract your attendance.

To recognize exceptional scientific quality, two papers will be selected as best papers, one of which will be the best student paper. The announcement of the winners will be made at the conference.

We expect to have an NCA 2014 quality conference this year, and look forward to seeing you soon.
