

Authors and Authors responsibilities

As an IEEE author, you must ensure that your article is an original work of the listed authors and is not previously published or currently submitted elsewhere. You must also follow all ethical guidelines including authorship, citation, data reporting, and publishing original research.

Our default position is that the corresponding author has the authority to act on behalf of all co-authors, and we expect the corresponding author to confirm this at the beginning of the publication process.

COPE also provides extensive resources on authorship and authorship disputes, and we encourage anyone involved in editorial decisions to familiarise themselves with these resources. We support our editors in dealing with any authorship disputes, including escalating or seeking advice on cases with COPE. We integrate with established and emerging industry standards to increase transparency in authorship (for example, ORCID).

IEEE's definition of authorship will help you answer that question and clarify each author's responsibilities. Definition of Authorship can be found via <https://journals.ieeeauthorcenter.ieee.org/become-an-ieee-journal-author/publishing-ethics/definition-of-authorship/>.

Ethical guidelines for journal publication

Each peer-reviewed article published in CJEE is an approval of the progress of scientific research in the field of Electrical Engineering. It directly reflects the quality of the authors' work and the institutions that support them. Peer-review is designed to support and embody scientific methods.

Therefore, it is very important that all parties involved in the act of the publication, including the author, journal editors, peer reviewers, publishers, and social organization, should common to perform the Publication Ethics as the moral behavior standards.

CJEE recognizes the Publication Ethics as our moral behavior, and takes our duties of guardianship over all stages of publishing extremely seriously.

Peer review process

All research articles, and most other article types, published in CJEE undergo thorough peer review. This usually involves review by two independent peer reviewers.

All submissions to CJEE are assessed by an Editor, who will decide whether they are suitable for peer review. Where an Editor is on the author list or has any other competing interest regarding a specific manuscript, another member of the Editorial

Board will be assigned to assume responsibility for overseeing peer review. Submissions felt to be suitable for consideration will be sent for peer review by appropriate independent experts. Editors will make a decision based on the reviewers' reports and authors are sent these reports along with the editorial decision on their manuscript. Authors should note that even in light of one positive report, concerns raised by another reviewer may fundamentally undermine the study and result in the manuscript being rejected.

All papers submitted to CJEE will be screened for plagiarism by CrossCheck software.

Peer review is a system based on trust. Each party—the reviewer, the author, and the publication—relies on the others to operate professionally, ethically, expediently, and confidentially.

Responsibilities of the Reviewer

- Provide a prompt, thorough, and impartial review of the article

- Give constructive feedback with reasonable suggestions and professional tone

- Avoid suggesting the addition of irrelevant or unnecessary references

- Alert editor to any suspected ethical issues

- Maintain confidentiality by safeguarding the unique contributions of the author's work

Responsibilities of the Author

- Accurately report research findings

- Ensure article meets all publication requirements and adheres to ethical standards

- Revise article as per reviewers' suggestions (or give a reason why not)

Responsibilities of the Publication

- The publication's responsibilities may be fulfilled by a journal Editor or Associate Editor.

- Select, invite, and manage reviewers

- Ensure a fair and speedy peer review process

- Synthesize disparate peer review reports and arrive at a final decision

- Maintain confidentiality by preserving the reviewer's anonymity and by safeguarding the unique contributions of the author's work

- Uphold all policies of the publication, including ethical policies

Any questions from authors or reviewers about the peer review process should be directed to the Editor.

Publication Ethics

CJEE as part of IEEE follow the Publishing Ethics for IEEE journals. The details can be found via

<https://journals.ieeeauthorcenter.ieee.org/become-an-ieee-journal-author/publishing-ethics/>

CJEE has the responsibility to maintain the rigour of scientific research and protect the researchers' intellectual property rights. In order to comply with the Publishing Ethics Committee of journal publishing ethics rules, CJEE Publication Ethics have been formulated as the guideline for the editing and publication of CJEE.

Copyright and access

All accepted articles will be published under open access. All open access articles will be published under the Creative Commons Attribution License (CC BY). CC BY allows authors to retain copyright of their article and permits a very broad range of reuse. An article published under the CC BY license is freely available online and may be freely reused as long as the original author and publication are credited. Reuse for commercial purposes or to create derivative works is permitted. Under the CC BY license, authors are responsible for protecting their content from possible abuses such as infringement and plagiarism.

Archiving

All published articles will be free access via
<https://ieeexplore.ieee.org/xpl/RecentIssue.jsp?punumber=7873788>

Ownership and management

CJEE is sponsored by China Machinery Industry Information Institute(China Machine Press), and co-technically sponsored by IEEE Power Electronics Society.

Funding

The publication costs for *Chinese Journal of Electrical Engineering* are covered by the Editorial Office of Chinese Journal of Electrical Engineering so authors do not need to pay an article-processing charge.

The web site

<https://ieeexplore.ieee.org/xpl/RecentIssue.jsp?punumber=7873788>

Confidentiality

Editors will treat all manuscripts submitted to CJEE in confidence. Reviewers are also required to treat manuscripts confidentially. CJEE will not share manuscripts with third parties outside of CJEE except in cases of suspected misconduct.

Plagiarism

CJEE as part of IEEE is a member of CrossCheck's plagiarism detection initiative and uses plagiarism detection software. If plagiarism is identified, the COPE guidelines on plagiarism will be followed.

We do not tolerate plagiarism in CJEE, and we reserve the right to check all submissions through appropriate plagiarism checking tools. Submissions containing suspected plagiarism, in whole or part, will be rejected. We expect our readers, reviewers and editors to raise any suspicions of plagiarism, either by contacting the relevant editor or by emailing cjee@cjeecmp.com.
