

*iEnergy* is an academic journal sponsored by Tsinghua University, is published quarterly. This journal aims at presenting the up-to-date scientific achievements with high creativity and great significance in the fields of electrical engineering and energy systems. Contributions all over the world are welcome. *iEnergy* is indexed by IEEE Xplore.

We publish papers in the following types: Original Articles, Letters, Reviews\*, Editorials, Research Highlights, and News & Views. For Editorials, For Research Highlights, and News & Views, they are all invited in house and do not go through peer review. Other three types (Original Articles, Letters, and Reviews) are selected for publication according to the editorial assessment of their suitability and evaluation from independent reviewers (i.e., single blind peer review). Peer reviewed papers are usually sent to two or more reviewers. Editorial staff will edit accepted papers to improve accuracy and clarity and shorten, if necessary.

### 1. Permissions

Authors wishing to include figures, tables, or text passages that have already been published elsewhere are required to obtain permission from the copyright owner(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the author(s).

### 2. Submission

Submission of a manuscript implies: that the work described has not been published before; that it is not under consideration for publication anywhere else; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities — tacitly or explicitly — at the institute where the work has been carried out. The publisher will not be held legally responsible should there be any claims for compensation.

The electronic manuscript should be sent to the editorial board through ScholarOne Manuscripts at

<http://mc03.manuscriptcentral.com/ienergy>.

### 3. Manuscripts

#### Language

The journal's language is English. We request that the language is corrected before submission. Submissions with unsatisfactory English will be returned without review.

#### Length of paper

There is no strict limit on the length of a manuscript. Nevertheless, authors are asked to make the manuscripts as concise as possible and to limit them to less than 40 manuscript pages (12-point font, typed in double space). The space required for the figures and tables should be calculated on the basis of their final printed size. Generally, the total number of tables should be less than 5 and the total number of figures should be less than 15

#### Authorship

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be named in an Acknowledgment section. The corresponding author should ensure that all appropriate co-authors (according to the above definition) and no inappropriate co-authors are included in the author list of the manuscript, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

### **Title and By-line**

The title should be descriptive, not full sentences. Name, affiliation (institution) of the authors, city, zip code, country, and E-mail address of the author(s) should be listed.

### **Abstract and Keywords**

The abstract of about 100–150 words should be a concise summary of the aims, methods, results, and conclusions and/or other significant items in the paper. Together with the title, it must be adequate as an index to all the subjects treated in the paper, and will be used as a base for indexing. The key words should include 3–8 pieces of words or phrases to serve as guidelines for indexing.

### **Text**

The text should contain an Introduction that puts the paper into perspective for readers, and should also contain Methods, Results, Discussion, and Conclusions. The SI system should be used for units of measure throughout the text.

### **Mathematical material**

The text should make clear distinctions between physical variables, mathematical symbols, units of measurement, abbreviations, etc. Authors should use italic and boldface to identify physical or mathematical variables. Variables are to be set in normal italic, and vectors, tensors, and matrixes in boldface.

### **Figures**

All digital arts, including micrographs, line arts, and grayscale images, included in the manuscript should be supplied in a separate electronic file in TIFF, EPS, or JPEG format with a preferred resolution of 600 dpi relative to the final figure size.

### **References**

Only essential references (formally published journals, articles, monographs, dissertations, reports, proceedings, standards, patents, and/or electronic publications) cited in the text can be listed and must be numbered consecutively by Arabic numerals, which should be listed in the same order as cited in the text. There should be at least ten references.

## **Acknowledgment**

The placement of the Acknowledgment appears after the final text of the paper, just before the References and after any Appendix(es). All financial support for the work should be listed here. Individuals, affiliation, or other to be concerned who were of direct help in the work should be acknowledged by a brief statement.

## **Declaration of competing interest**

Authors are required to disclose financial or non-financial interests that are directly or indirectly related to the work submitted for publication. Please refer to “Competing interests” section below for more information on how to complete this section. Please note: If no conflict exists and no ethics approval required, the authors should state:

The author(s) has(have) no competing interests to declare that are relevant to the content of this article.

## **4. After Acceptance**

### **Copyright**

The author(s) hold the copyright. The articles published in this journal are distributed under the terms of the Creative Commons Attribution License which permits any use, distribution, and reproduction in any medium, provided the original author(s) and source are credited.

### **Proofreading**

The purpose of the proof is to check for typesetting errors and the completeness and accuracy of the text, tables and figures. Substantial changes in content, e.g., new results, corrected values, title and authorship, are not allowed without the approval of the Editor-in-Chief.

### **Online first**

The articles will be published online after receipt of the corrected proofs. This is the official first publication citable with the DOI. After release of the printed version, the paper can also be cited by issue and page numbers.

After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article.
