

SUBJECT INDEX

A

- Aircraft Radio:
 - Range Beacon Free from Night Effects: 1091, 1092
- Amplifier:
 - Class B from Class A Standpoint: 1095
 - Discussion on Analysis Radio-Frequency Power, Wave Forms: 1016
 - Discussion on Supervisory and Control Equipment for Audio-Frequency: 1061
 - Grid Driving Power for Radio-Frequency: 1118
 - Performance of Push-Pull Audio: 1079
 - Supervisory and Control Equipment for Audio: 1061
- Amplitude Characteristics of Coupled Circuits Having Distributed Constants: 1119
- Amplitude Distortion:
 - Audio Reproducing Systems: 1086
- Antenna:
 - Mutual Impedance of Wires: 1053
- Antenna Resistance Calculation, Correction: 869
- Anticyclones and Kennelly-Heaviside Layer: 1089
- Atmospherics:
 - Audio-Frequency: 1147
- Attenuation:
 - Transmission on 1.5 to 3.5 Mc: 1145
- Audio-Frequency:
 - Piezo-Electric Loud Speaker for Higher: 1141
- Audio-Frequency Amplifiers:
 - Class B from Class A Standpoint: 1095
 - Performance of Push-Pull: 1079
 - Supervisory and Control Equipment for: 1061
- Audio-Frequency Atmospherics: 1147

B

- Book Reviews:
 - Acoustics and Architecture, by P. E. Sabine, (reviewed by Frank Massa): 1083
 - An Appraisal of Radio Broadcasting in the Land-Grant Colleges and State Universities, by T. F. Tyler, (reviewed by W. G. Cady): 1125
 - Annual Table of Constants and Numerical Data, by R. Mesny, (reviewed by L. E. Whittemore): 1111
- Communication Engineering, by W. L. Everitt, (reviewed by F. W. Grover): 1054
- Die Kathodenstrahlröhre und ihre Anwendung in der Schwachstromtechnik, by Manfred von Ardenne, (reviewed by L. P. Wheeler): 1168
- Elements of Engineering Acoustics, by L. E. C. Hughes, (reviewed by Benjamin Olney): 1136
- Handbook 16. Code for Protection Against Lightning, by U. S. Department of Commerce, (reviewed by H. H. Beverage): 1096
- Handbook of Chemistry and Physics (Seventeenth Edition), (reviewed by R. R. Ramsey): 1057
- High Selectivity Tone-Corrected Receiving Circuits, by F. M. Colebrook, (reviewed by H. A. Wheeler): 1058
- Mesures Radio-Electrique Elementaries, by F. Dacos and M. Rousseau, (reviewed by L. P. Wheeler): 1139
- Modern Connectors for Timber Construction, by U. S. Department of Commerce, (reviewed by T. A. M. Craven): 1097
- Network Synthesis, by C. M. Son Gewertz, (reviewed by F. W. Grover): 1149
- Photocells and Their Applications (Second Edition), by V. K. Zworykin and E. D. Wilson, (reviewed by W. C. White): 1056
- Radio Engineering, by F. E. Terman, (reviewed by H. M. Turner): 1055
- Radio Engineering Handbook, by Keith Henney, (reviewed by R. R. Batcher): 1081
- Radio International, by E. A. Pariser, (reviewed by J. A. Sohon): 1124
- Report of the Radio Research Board for the Year 1931, (reviewed by S. S. Kirby): 1082
- Servicing Receivers by Means of Resistance Measurement, by J. H. Rider, (reviewed by S. S. Kirby): 1069
- Short Wave Wireless Communication, by A. W. Ladner and C. R. Stoner, (reviewed by I. S. Bemis): 1110
- Standard Year Book, 1933, by U. S. Department of Commerce, (re-

viewed by L. E. Whittemore): 1112
 Television et Transmission des Images, by Rene Mesny, (reviewed by Madison Cawein): 1150
 The True Road to Radio, by Albert Hall, (reviewed by S. S. Kirby): 1074
 Theory of Thermionic Vacuum Tubes, by E. L. Chaffee, (reviewed by J. C. Warner): 1123
 Thermionic Vacuum Tubes, by E. V. Appleton, (reviewed by B. E. Shackelford): 1068
 Vector Analysis, by H. B. Phillips, (reviewed by F. W. Grover): 1137
 Wireless Receivers, by C. E. Oatley, (reviewed by H. A. Wheeler): 1138
 Broadcast Frequency Allocation: Required Minimum Separation: 1059
 Broadcasting:
 Low Power Transmitters: 1060
 Reception of Synchronized: 1128
 Required Frequency Separation: 1059

C

Calculation of Radiation Resistance of Antennas, Correction to: 869
 Capacity Variation and Frequency Modulation: 1120
 Characteristics of Ultra High Frequency Transmission: 1129
 Circuit Analysis:
 Calculating Transmission Properties of Electrical Networks: 1122
 Coupled Circuits Having Distributed Constants: 1119
 Diode Detection: 1099
 Discussion on Parallel Resonance: 1064
 Ellipse Diagram for Lecher Wire System: 1066
 Equivalent Circuit of Active Network: 1052
 Errata on Transmission Curves of High Frequency Networks: 1051
 Parallel Resonance: 1064
 Resonance Relations and Thevenin's Theorem: 1109
 Circuit Theory:
 Relations of Coupled, and Transducer Theory: 1065
 Coil:
 Calculation of Mutual Inductance: 1108
 Concentric Conductor Transmission Line: 1133
 Coupled Circuits Having Distributed Constants: 1119

Crystal Oscillators:
 Modes of Vibration: 1104
 Cyclones and Kennelly-Heaviside Layer: 1089

D

Definition:
 Television: 1130
 Detection:
 Diode Analysis: 1099
 Power: 1103
 Two Modulated Waves: 1080
 Diode Detection Analysis: 1099
 Diode Rectification:
 Discussion on Grid and: 978
 Distortion:
 Audio Reproducing Systems: 1086
 Disturbances:
 Electrical of Extraterrestrial Origin: 1140
 Dynamic Measurements of Tube Coefficients: 1094

E

Earth Potential Measurements: 1166
 Eclipse:
 Kennelly-Heaviside Layer Records During Solar: 1075, 1076
 Electrical Disturbances of Extraterrestrial Origin: 1140
 Electromagnetic Shielding:
 For Frequencies Between one and Thirty Kilocycles: 1078
 Electronics:
 Tube, at Ultra High Frequencies: 1152
 Ellipse Diagram of Lecher Wire System: 1067

F

Ferro-Inductors and Permeability Tuning: 1087
 Field Intensity:
 Calculation of High Frequency: 1106
 During Solar Eclipse: 1076, 1077
 Field Strength:
 Calculation of High Frequency: 1106
 Filter:
 Calculation of Properties of Transmission Networks: 1122
 Magnetostriction: 1131
 Two Elements Low Pass: 1158
 Frequency:
 Measurement: 1044
 Simplified, Dividing Circuit: 1102
 Variation, Harmonic Content and Constant Frequency Oscillators: 1101
 Frequency Changers:
 Doubling in Triodes: 1045

Frequency Divider:
Simplified Circuit: 1102
Frequency Doubling:
In Triodes: 1045
Frequency Modulation:
and Effects of Capacity Variation:
1120
In Visual Transmission: 1046
Frequency-Reactance Chart: 1135
Frequency Separation:
Required Minimum for Broadcast-
ing: 1059

G

Generator:
Light, for Testing Light Sensitive
Devices: 1157
Graphite Anodes for Tubes: 1113
Grid Rectification:
Discussion on Diode and: 978

H

Harmonics:
Frequency Variation, and Constant
Frequency Oscillators: 1101
In Tubes With Resistive Loads:
1144

I

Impedance:
Mutual of Antenna Wires: 1053
Inductance:
Calculation of Mutual: 1108
Ferro-Inductor: 1087
Induction and Radiation: 1154
Insulators:
Mycalex: 1132
International Polar Year Measure-
ments: 1166
Ionized Layer:
During Solar Eclipse: 1075, 1076
Propagation of Waves in, 1062
Ionosphere:
Continuous Measurements: 1146

K

Kennelly-Heaviside Layer:
Continuous Measurements: 1146
Cyclones and Anticyclones: 1089
During Solar Eclipse: 1075, 1076
Propagation of Waves in: 1062
Kinescope: 1161

L

Law:
Aspects of Radio: 1153
Lecher Wire:
Ellipse Diagram for: 1066
Life Test:
Power Supply Utilizing Thyratrons:
1115

Light:
Flux Generator for Testing Light
Sensitive Devices: 1157
Methods of Modulating: 1148
Linear Rectifier:
Detecting Two Modulated Waves:
1080
Linearly Tapered Loaded Transmis-
sion Lines, Discussion: 1029
Loud Speaker:
Discussion on Amplitude of Cones:
830
Piezo-Electric: 1141
Low-Pass Filter:
Two Element: 1158

M

Magnetrostriction Filter: 1131
Magnetron:
Theory on: 1117, 1167
Measurement:
Continuous Ionosphere: 1146
Low Frequency Receiving: 1134
Simplified Frequency Dividing Cir-
cuit: 1102
Tube Characteristics in Positive
Grid Region: 1114
Tube Coefficient Dynamic: 1094
Ultra-Radio Wave: 1044
Vacuum Tube Voltmeter: 1047
Microphones:
Sound and Ribbon: 1084
Modulation:
Frequencies in Visual Transmission:
1046
Frequency, and Effects of Capacity
Variation: 1120
Methods for Light: 1148
Products in Power Law Modulator:
1121
Transformer Coupled Modulators:
1100
Modulator:
Modulation Products in Power Law:
1121
Transformer Coupled: 1100
Mutual Inductance:
Calculation: 1108
Mycalex: 1132

N

Network Analysis:
(See Circuit Analysis)
Coupled-Circuit and Transducer
Theory: 1065
Diode Detection: 1099
Networks:
Equivalent Circuits of Active: 1052
Transmission of High-Frequency:
1051
Night Effects:
Range Beacon Free From: 1091,
1092

O

- Optical Behavior of Ground for Short Radio Waves: 1090
- Oscillations:
 - Ultra Short Wave, With Cold Cathode Tubes: 1156
- Oscillator:
 - Constant Frequency, and Frequency Variation and Harmonic Content: 1101
 - Effect of Capacity Variation: 1120
 - Frequency Modulation: 1120
 - Having Linear Operating Characteristic: 1049
 - Operation on Common Load: 1165
 - Theory on Magnetron: 1117, 1167
 - Vibration of Crystal: 1104
- Oscillographic Measurements:
 - Tube Characteristics in Positive Grid Region: 1114
- Output:
 - Operating Conditions and, for Triodes: 1098
- Overland Transmission:
 - Attenuation at 1.5 to 3.5 Mc: 1145

P

- Permeability Tuning and Ferro-Inductors: 1087
- Photocells:
 - Generator for Testing: 1157
- Piezo-Electric Crystal Oscillator:
 - Vibration of: 1104
- Piezo-Electric Loud Speaker: 1141
- Pittsburgh's Contribution to Radio, Discussion: 1031
- Polar Year Measurements: 1166
- Polarization:
 - Waves Traveling Obliquely to Earth's Magnetic Field: 1116
- Police Radio:
 - System for New York City: 1126
- Power:
 - Grid Driving for Radio-Frequency Amplifiers: 1118
- Power Detection:
 - Analysis: 1103
- Power Law Modulator: 1121
- Power Supply:
 - Life Test Using Thyratons: 1115
 - Oscillators Operated from Common: 1165
- Propagation:
 - Attenuation Between 1.5 and 3.5 Mc: 1145
 - Cyclones and Anticyclones: 1089
 - During Solar Eclipse: 1075, 1077
 - In Ionized Layer: 1062
 - Low-Frequency Waves: 1063
 - Optical Behavior of Ground: 1090
 - Polarization of Waves Traveling

- Obliquely to Earth's Magnetic Field: 1116
- Report of Committee: 1143
- Study of Waves Between Three and Eight Meters: 1070
- Ultra Short Waves: 1072, 1073
- Waves Below Ten Meters: 1071
- Waves Between 150 and 2000 Kilocycles: 1105
- Waves for Distances of 50 to 2000 Kilometers: 1105
- Push-Pull Amplifiers:
- Performance of Audio: 1079

R

- Radiation and Induction: 1154
- Radiation Resistance:
 - Concentric Conductor Line: 1133
- Radio-Frequency Amplifiers:
 - Grid Driving Power: 1118
- Radio-Frequency Transmission Lines:
 - Graphical Method for Problems: 1066
- Radio Law:
 - Aspects: 1153
- Radio Patrol System for City of New York: 1126
- Radio Range Beacon Free From Night Effects: 1091, 1092
- Radio Systems:
 - Police: 1126
- Radiotelephone:
 - Ship-Shore Transmission: 1049
 - Transoceanic Reception: 1048
- Range Beacon:
 - Radio, Free From Night Effects: 1091, 1092
- Reactance-Frequency Chart: 1135
- Receiving Measurements:
 - Low Frequency: 1134
- Receiver:
 - Ribbon Telephone: 1085
 - Television: 1093, 1163
 - Tone Corrected Highly Selective: 1127
- Reception:
 - Synchronized Broadcast Stations: 1128
 - Transoceanic, High-Frequency Telephone: 1048
- Rectification:
 - Discussion on Grid and Diode: 978
- Rectifier:
 - Detecting Two Modulated Waves With Linear: 1080
 - Thyratrons, in Life Test Power Supply: 1115
- Resonance:
 - Analysis of Parallel: 1064
 - Discussion on Parallel: 1064
 - Some Relations and Thevenin's Theorem: 1109

Reverberance:
Sound and, Ribbon Microphone: 1084
Ribbon Telephone Receiver: 1085
Ribbon Microphone, Sound and: 1084

S

Shielding:
Electromagnetic, Between One and Thirty Kilocycles: 1078
Spray, Tubes: 1088
Ship-Shore Radiotelephone Transmission: 1049
Solar Eclipse:
Kennelly-Heaviside Layer Records: 1075, 1076
Sound:
Collection of, and Ribbon Microphone: 1084
Speech:
Distortion in Audio Systems: 1086
Speech Input Equipment:
A-C Operated: 1142
Spray-Shield Tube: 1088
Static:
Audio-Frequency: 1147
Disturbances of Extraterrestrial Origin: 1140
Superregeneration:
Wave Meter for Ultra Short Waves: 1155
Synchronized Broadcasting:
Reception of: 1128

T

Telephone:
Transoceanic Reception: 1048
Telephone Receiver:
Ribbon: 1085
Television:
Definition: 1130
Image Characteristics: 1159
Modulation Frequencies: 1046
Receiving Circuits: 1093, 1163
System: 1160, 1161
Transmitter: 1162
Testing:
Light Generator for Light Sensitive Devices: 1157
Thevenin's Theorem: 1109
Thyratrons:
Life Test Power Supply Utilizing: 1115
Tone Correction:
Action of, Highly Selective Receivers: 1027
Transducers:
Nonlinearity in: 1107
Transducer Theory and Coupled Circuits: 1065
Transformers:
Modulators Coupled by: 1100

Transmitter:
A-C Operated Speech Input Equipment: 1142
Low Power Broadcast: 1060
Television: 1162

Transmission:

Attenuation for, of 1.5 to 3.5 Mc: 1145
Calculation of Properties in Electrical Networks: 1122
Cyclones and Anticyclones: 1089
During Solar Eclipse: 1076, 1077
Field Strength Calculation for High-Frequency: 1106
In Ionized Layer: 1062
Low-Frequency Waves: 1063
Modulation Frequencies in Visual: 1046
of High-Frequency Networks: 1051
Optical Behavior of Ground: 1090
Polarization of Waves Traveling Obliquely to Earth's Magnetic Field: 1116
Report of Committee: 1143
Ship-Shore Radiotelephone: 1049
Short-Wave to South America: 1050
Study of Three to Eight Meter: 1070
Ultra High Frequency: 1129
Ultra Short Waves: 1072, 1073
Waves Below Ten Meters: 1071
Waves Between 150 and 2000 Kilocycles: 1105
Waves for Distances of 50 to 2000 Kilometers: 1105

Transmission Line:

Graphical Methods for Problems: 1066
Radiation Resistance of Concentric Conductor: 1133

Triodes:

Output and Operating Conditions for: 1093

Tube:

Analysis of Power Detection: 1103
Characteristics in Positive Grid Region: 1114
Cold Cathode for Ultra Short Wave Oscillations: 1156
Diode Detection Analysis: 1099
Electronics at Ultra High Frequencies: 1152
Frequency Doubling in Triode: 1045
Graphite Anodes: 1113
Harmonic Production With Resistive Loads: 1144
High Frequency: 1164
Improvement in Vacuum, Voltmeter: 1047
Measurement Dynamic Coefficients: 1094
Operation on Common Load: 1165
Output and Operating Conditions of Triodes: 1098

Small Dimensions: 1164
Spray Shield: 1088
Tuning:
Permeability: 1087

U

Ultra Short Radio Waves:
Characteristics of: 1129
Discussion on Review of: 923
Frequency Measurement: 1044
New Field For: 1151
Oscillations With Cold Cathode
Tube: 1156
Propagation: 1072
Propagation Below Ten Meters:
1071
Study of Propagation: 1070

Superregenerative Wave Meter For:
1155
Transmission: 1073

V

Vacuum Tube Voltmeter:
Improvement in: 1047
Vibration of Crystal Oscillators: 1104
Visual Transmission:
Modulation Frequencies: 1046
Voltmeter:
Improvement in Vacuum Tube:
1047

W

Wave:
Measurement, Ultra-Radio: 1044
Wave Meter:
Superregenerative: 1155
